SUMMARY

Computer Science graduate with hands-on experience building end-to-end AI applications using Python, LangChain, LangGraph, FastAPI, Retrieval-Augmented Generation (RAG), ChromaDB, and Large Language Models (LLMs). Skilled in designing AI agent workflows, REST APIs, document processing pipelines, semantic search, vector database integrations, authentication, and production-oriented AI applications.

EDUCATION

B.Tech, Computer Science and Engineering, Babu Banarasi Das University
CGPA: 7.9/10

Graduated: June 2025

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript

Generative AI & Agentic AI: LangChain, LangGraph, Retrieval-Augmented Generation (RAG), LLM Orchestration, Prompt Engineering, Groq Llama 3

ML & Data Processing: Scikit-learn, XGBoost, Pandas, NumPy, Feature Engineering, Model Evaluation, Exploratory Data Analysis (EDA)

Backend & APIs: FastAPI, REST APIs, JWT Authentication, SQLAlchemy, Pydantic, Uvicorn

Vector & Database Technologies: ChromaDB, Hugging Face BGE Embeddings, Vector Databases, Semantic Search, MySQL, PostgreSQL, SQLite, SQL Server

Deep Learning: TensorFlow, PyTorch, Keras, ANN, CNN, RNN, LSTM, NLP

Cloud & Developer Tools: AWS (S3, Athena), Docker, Git, GitHub, Streamlit, Jupyter Notebook, VS Code

Analytics & Visualization: Power BI, Tableau, Excel, Matplotlib, Seaborn

PROJECTS

AI Site Progress Agent

[GitHub](#)

Python, LangGraph, LangChain, FastAPI, SQLite, Groq, JavaScript

- Built a multi-node LangGraph-based AI agent to transform natural-language project updates into structured task intelligence, automatically classifying work as completed, in-progress, delayed, and blocked.
- Designed conditional agent routing for risk and dependency analysis, project health assessment, critical-project escalation, and recommendation generation using orchestrated LLM workflows.
- Integrated LLM-powered structured JSON extraction with a FastAPI backend, SQLite persistence, and a JavaScript dashboard to create an end-to-end pipeline for storing, retrieving, and visualizing AI-generated project analysis.
- Implemented multi-status task handling and deterministic rule-based project health evaluation, enabling simultaneous status detection and improving consistency of project risk assessment.

Enterprise AI Customer Support Platform

[GitHub](#)

Python, FastAPI, LangChain, ChromaDB, Hugging Face BGE Embeddings, Groq Llama 3, JWT Authentication, SQLite

- Built an end-to-end Retrieval-Augmented Generation (RAG) platform that delivers context-aware answers from organizational knowledge-base documents using semantic retrieval and LLM-based response generation.
- Developed a secure FastAPI backend with REST APIs, JWT authentication, SQLAlchemy ORM, and role-based access control for protected document access and AI chat interactions.

- Engineered a document processing pipeline covering PDF ingestion, document chunking, Hugging Face BGE embedding generation, ChromaDB vector storage, semantic retrieval, and Groq Llama 3 response generation.
- Designed a Streamlit interface supporting document upload, multi-document search, conversation history, and dynamic vector database updates to streamline knowledge-base management.

Loan Approval Prediction

[GitHub](#)

Python, Pandas, NumPy, Scikit-learn, XGBoost, Streamlit, Matplotlib

- Built an end-to-end machine learning pipeline to predict loan approval outcomes using applicant income, credit score, loan, and asset information.
- Performed data cleaning, preprocessing, feature engineering, categorical encoding, and feature scaling; engineered features including Total Assets, Loan-Income Ratio, and Asset Coverage Ratio.
- Trained and compared Logistic Regression, Decision Tree, Random Forest, and XGBoost classifiers using accuracy and cross-validation to evaluate predictive performance.
- Deployed the selected trained model through an interactive Streamlit application, enabling users to input applicant details and receive real-time loan approval predictions.

EXPERIENCE

Data Analyst Intern

Jan 2026 – Apr 2026

Money Maximising Advisor

Remote — Paid Internship

- Automated interconnected Excel reporting workflows using advanced formulas, cross-sheet references, and linked datasets to reduce manual data handling and improve reporting accuracy.
- Developed dynamic financial dashboards and KPI reports using PivotTables, XLOOKUP/VLOOKUP, charts, conditional formatting, and data validation to improve business and operational visibility.

Data Analyst Intern

Nov 2025 – Jan 2026

Skillytixs

Remote

- Analyzed 100,000+ transaction records using SQL and Python to identify customer behavior patterns, product trends, and key revenue drivers across 10+ product categories.
- Developed 20+ complex SQL queries and interactive Power BI dashboards using JOINS, GROUP BY, HAVING, and window functions, identifying three underperforming store segments and improving KPI visibility for business decisions.

CERTIFICATIONS

- [Databricks Fundamentals Certification](#) – Databricks
- [Data Analyst Certification](#) – OneRoadmap
